Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, American Express, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Hemostatic Heaven

Hemostats are the clamplike devices dangling from veins and arteries in melodramatic operating scenes. Our particular collection are Pakistani surgical-grade instruments made of magnetic stainless steel. As such we rate them pretty good, but not fantastic. Hemostats look like little pliers. The jaws are relatively fine, with rounded tips. The inside faces are lightly serrated to get a grip on tubing or body plumbing. And the handles are much longer than the jaws. Now the heavenly part. Great hobby clamps that can be worked into small areas. Fine heat sinks for electronics. Good hook extractors for trout fisherpeople. Excellent tubing clamps for flow-sensitive chemistry experiments. Back To Basics

It could have been called an Alabama Buzzer after Alabama Vest, the man who invented it. Or a Clegghorn, after Thaddeus Von Clegg, the clock master who fabricated the first one. But the hand-crafted 4-3/4" long steel instrument was a simple amusement, and the 1840s were a simple time. So it's simply a kazoo. **WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

In assorted plastic colors with a steel slide, 6-7/8" long x 1/2" dia.

ALL Things To ALL People

This deluxe ABS storage case is called a Store-It-ALL, and it does. But it could be called a Carry-It-ALL, for the sturdy handle and locking clasp, or it could be called a See-It-ALL, for its translucent lid. Or a Fits-It-ALL, for the removable dividers that let you configure it with any number of compartments from 5 to 26. But the 12" x 18" x 3" OA case should really be called ALL-I-Ever-Needed- To-Get-Organized!

Make It Pop!

We can't stop popping the tops on these plastic pop-top vials. Measure 2-3/4" tall x 1-3/4" dia and look vaguely like the bigger sibling of an old film canister, except these are clear so you can always see how much is in them. Lid snaps tightly closed, and you squeeze the sides to pop it open again. Try to do it just once and then stop. Impossible. If you forget how to do it, after doing it fourteen times in a row when you first get yours, instructions are on the lid. Use them for pills or breath mints or anything you'd put in little canisters you love popping open.

Mylar Warmth

They have the look of something designed for the space program. They're mylar, a paper-thin shiny metallic sheet, that comes in handy when your car breaks down in winter, or when you're separated from your climbing group on the slopes of Denali. Barring that, they're also a perfect material for a do-it-yourself cold-climate Halloween costume—near impossible to rip by hand, but cut easily with scissors. There's no padding, so they wouldn't be too comfy on your bed, but they sure are warm. They both come folded about the size of a wallet. The Blanket is 52" x 82", the Sleeping Bag is 34" x 84".

Wanna Avoid Ralping?

Leave the barf bag at home and pack these Motion Sickness Glasses from Happy Go Luxy! They're the non-pharmaceutical way to make sure that what's in your gut stays down there when you're racing along in a train, plane or automobile (especially the dreaded back seat). Plus, they look good—kind of '80s New Wave Rocker-meets-Minion—in black rubbery plastic with a deep purple/blue liquid in the frames. They work in 10 minutes and feel comfortable on the face. Help to ease dizziness, lightheadedness, sweating, nausea and, of course, vomiting. Sort of one size fits all, but if you must know, the front section measures 5" across, the eye holes are 2" dia and the sides are 5-1/2" long. Box claims they're 95-percent effective, which means there's a 5-percent chance you might lose your lunch. Great odds for anyone who doesn't travel well.

A Real Rod Magnet

Our old buddy Rod was quite the magnet—mostly for trouble and Johnny Law—so we can't help feeling nostalgic as we grip this 4" x 3/8" alnico rod magnet. Because of their temperature stability and relatively high magnetic strength, alnico magnets are often used in industry for applications involving rotating machinery, meters and instruments—stuff that would have bored Rod out of his head but is important, nonetheless.

Killer Magnet

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 3/8" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. And wreak havoc with your monitor.

38694 Killer Magnet \$14.50/each

Sticky Bar Of Silver

This plated N45 neodymium magnet is shaped like a miniature silver ingot, measuring 1-1/2" long x 1/2" wide x 1/8" thick. Has a big hangonability quotient, which the manufacturer claims is 15 lbs of pull, meaning it's probably closer to 13 lbs. Impressive either way.

95659 Neo. Bar Magnet \$4.85/each

Rock The Poles!

We just want to celebrate...this magnet. (Classic rock fans, you're welcome for the references.) This Alnico cylinder magnet measures 9/16" x 11/16" with a 5/16" x 3/8" slotted hole (we think that's what it's called) in the center. It's a strong bugger at 10 lbs lifting power in the ends, and very shiny silver. Hole makes it great for attaching string to it and retrieving keys lost down the sewer or well. You know, when you lose your keys that way. Made in the USA. You'll get (1) hyper strong magnet per order.

Rare Find!

Rare earth magnets are usually killers for their size, and these thick nickel neodymium discs are no exception. The price, on the other hand, for (3) 7/16" dia x 1/4" 5-lb lift or (2) 9/16" dia x 3/16" 8-lb lift magnets each stored on a 2" dia steel disc, is a rare exception.

We're liking this little plated N45 neodymium magnet because it will stand on end and stick out very prettily on the ice box. Measures 1" tall x 1/4" square with a hefty, for its size, 3-1/2 lb pull, 13,800 gauss. (Will also lie down on its side, of course, because everybody does.)

Mounting Animal Magnetism

You hear that? Like a deeply satisfying metallic clink? That's the sound of a powerful round mounting magnet in a focusing cup with a hole in the center uniting with the metal surface of your choice. The magnet is 1-1/4" dia x 1/4" thick and the hole is about 1/8" dia. We estimate 25+lbs pull based on the face our owner made trying to pull it off his file cabinet. This Will Pomp You Op!

If there are two things the Swiss military knows, it's knives and pumps. Here's a manual water pump—used and surplus, which means it's authentic, and collectible. Has a 20" long x 1-7/32" silver metal body, 12-1/2" long red wooden t-handle and a rubberish output hose approx 8 feet long x 5/8" dia. that has a threaded fitting and an 18-1/2" x 15/32" metal nozzle with, yep, a red wood handle. An arm with square hole and bolt for locking at desired height on the base's heavy-duty support beam, depending on water levels, is just below the handle. Base is heavy cast metal approx. 12-5/8" x 11" and is chevron shaped. Probably dates from the early '80s, back when the Swiss were neutral. I Will Survive...

You will survive, too, just like Gloria Gaynor, and in the woods, even. But only if you have this U.S. Army manual, cleverly titled: SURVIVAL, Department of the Army Field Manual FM21-76. It's 287 heavily illustrated pages of techniques for staying alive (add your own BeeGee jokes here) including orientation; food & cooking; fire- and shelter-making; rafts; animal, insect and plant recognition; and much more. This is the 1970 edition, but staying alive in the woods hasn't changed a whole lot since then. In soft-cover.

Might have a slightly musty aroma (but definitely not fishy) that a little sunshine time will fix. Great for maritime-theme decoration, or, we suppose, fishing. And perfect if you want to go to a costume party as Poseidon.

This pop-out magnifier lens offers the practical implications of a magnifying lens with the sensible space-saving storage and cool-factor of a switchblade. Surprise!!

Mystery boxes of stuff like what you see in the catalog. Maybe we had a little left but not enough to continue the listing. Maybe we only got a few as part of an odd lot. Maybe we lost some, and just found them in the warehouse. You will get items which originally listed for at least \$25.00 total in our catalog (or would have, if we had enough). You pick. The "electro-mechanical" box has things like motors, switches, hardware and components that are useful parts but want to be worked into something bigger. The "consumer" box has more ready-to-go type items, and things that don't have as technical a flavor, like bottles, toys, books, and giant rubber bands. The fun is in the mystery and surprise. Perfect if you don't know what to give Aunt Maude and Uncle Ned, or if you can't decide how to bring your order up to the minimum. Every couple of months the contents will keep changing, so even if you have gotten a box before, feel free to order again!!
